EDUCATION

Dalhousie University

Master of Applied Computer Science – 2021 (Expected)

Gujarat Technological University

Bachelor of Computer Engineering - 2019

PROJECTS

Fire Blog   **March 2019**

- This is a photo blogging app that I have made while learning Firebase. Implemented features such as a user can like, create, share & delete posts. Users can set a username, bio, and profile picture. Learned tools like Firestore, Database, Crashlytics, Authentication, and Material Design 2.

Directly   **July 2019**

- Directly allows you to create a shortcut of any file on your device or URL to the home screen. Users can also customize the appearance of the icon according to your liking. You can pick an icon background color and write a custom label that will be displayed on the home screen.

App Digger   **June 2019**

- App Digger is the simplest app manager for your device. You can share or extract any user application in APK format. Also, it provides you critical system information such as availability of root access, display resolution and refresh rate, battery temperature and voltage, etc.

Pencil   **June 2019**

- Pencil is simply the quickest way to offload ideas, thoughts, and to-dos without losing focus. Pencil helps you in reminding things by generating a persistent notification in your status bar. The reminder does not pop-up or rings, it just sits in your notification tray and still does its job most efficiently.

EXPERIENCE

Eyuva Technologies | Software Engineer | May 2017 – June 2018

- Worked on Android apps with more than 10 modules and thousands of lines of code.
- Managed deployment of the apps on Google Play.
- Actively contributed to daily standups, retrospective, and sprint planning.

Google Developer Group | Co-Organizer & Speaker | August 2017 – March 2018

- Delivered an hour-long lecture and firsthand of Android instant apps, at GDG-Rajkot
- Co-Organized 4 Google Developer Group's events with more than 1000 participants
- Collaborated with the best designers and developers around the region.

SKILLS

Java | HTML | Sails.js | Node.js | Android | AWS | Docker | AdobeXD | Git | Firebase | Scrum
